Profile

Lorien Engineering Solutions provides engineering design and capital project management services. Feasibility studies and projects cover manufacturing expansion and/or relocation, translation from research to production, manufacturing and research facility design, product processing and packing. Founded in 1985, our portfolio includes medicines, household and beauty products, food processing and packing, brewing, beverages, fine chemicals, biotech and regenerative medicine. Capabilities cover: processing, packing, utilities, facility design and building services, electrical / automation, sustainable waste and energy, compliance and safety. We are an ISO9001 company, and members of aPS (CDM Coordination), Safe Contractor Scheme and RoSPA - with a RoSPA Order of Distinction in 2009.
